Business activity

To be a Solution Provider

Business policy

- Aim at a leading company in niche fields based on agent business for foreign characteristic chemical manufactures.

Operating activity

- Quick response for customer needs and requests.
- Put a high priority on quality and stable supply.
- Our overseas trading accounts for 90%.

Promoting field

- Procure plastic additives and specialty chemicals from abroad.
- The Japanese market development of Titanium dioxide from Tronox.
- Making establish the Asian sales base with INEOS ChloroToluenes derivatives.
- Promoting development of one pack plastic additives in the domestic market which may help Japanese manufacturers' global business expand.

Our advantages

1

Process customer orders and requests quickly with team work.
Most of our handling products are established by agency or distributor agreements with suppliers which lead to secure reliable quality and stable supply.

2

Established local stock networks enable us to deliver products to customers in a short period of time.

3

Making use of our long plastic additives business experiences,
We can offer a variety of additive formulations for your specific needs and compound trustees.

4

For your cost down or overseas operation we can arrange product consignment or collaboration with Korean or Chinese companies under confidential agreement.

5

Willing to discuss collaboration possibility of research and development.
